Heart health: The link between Type 2 Diabetes and Chronic Kidney Disease

Keep your blood sugar and blood pressure under control in your target range.

Act today for tomorrow

Gain a second chance to have more time with loved ones and build the healthy life you love.

Keep moving

Stop smoking

Lose weight

Get tested
- Blood tests check kidney filtration rate.
- Urine tests check for protein in urine.

Kidney disease is a common complication of type 2 diabetes. If you have type 2 diabetes and kidney disease, you’re at 3x higher risk of dying from a cardiovascular event like heart attack or stroke. There are actions you can take to reduce your risk.

If you have diabetes, there is a lot you can do to reduce your risk for heart disease. Talk to your doctor about your next steps.
